

TRANSENIX

THE EASIEST WAY TO ACCEPT PAYMENTS

Transenix is a solution that turns a smartphone into a payment terminal and makes it possible to make contactless payments using Tap to Phone technology, by connecting a card, phone, or other gadget supporting NFC payments to the smartphone on which Transenix is installed, there is also the ability to accept payment by QR and accept other financial transactions, such as Reverse, Refund, Z-report

How it works

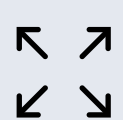

SPEED AND LIGHTNESS

- The complete registration cycle from opening a bank account to the ability to accept payments takes up to 30 minutes
- There is no need to order and wait for the terminal, you can accept payments immediately after completing the registration

SAFETY AND RELIABILITY

- The security and reliability of the solution meet the requirements of the international payment systems Visa and Mastercard, the Security Evaluation of the Riscure laboratory, and is confirmed by the reviews of sellers and buyers who use our solution daily

FLEXIBILITY AND ADAPTABILITY

- The place of service is not tied to the location, it is enough to have access to the Internet
- Flexible terminal settings
- Ability to add subordinate terminals
- The possibility of receiving tips

AVAILABILITY AND INFORMATIVENESS

- You don't need to buy a terminal
- There is no need to pay for terminal maintenance
- No need to refill paper for printing receipts (E-receipt)
- Extensive transaction analytics are available
- Customer support in the application
